

Call for Papers

2024 International Conference on Management and Operations Research

Xijiao Hotel, Beijing, China

December 13 - 15, 2024

<http://icmor.ustb.edu.cn>

The 2024 International Conference on Management and Operations Research (ICMOR 2024) will be held in Xijiao Hotel, Beijing, China on December 13-15, 2024. The aim of the conference is to provide a high-quality platform for scholars to share their latest ideas, knowledge and experience in the fields of management and operations research. The theme of ICMOR conference this year is on management science, operations research and their interdisciplinarity, especially on management and total innovation. Specific topics include but not limited to the topics given below. In consultation with Transportation Research Part E: Logistics and Transportation Review and Economic Modelling, the selected papers are encouraged to be submitted to the journals if they fit the scope of the journals. In addition, the organizer is contacting more SCI or SSCI indexed journals for the selected papers to be submitted to. Conference papers to Economic Modelling and other SCI or SSCI indexed journals will go through the regular reviewing process. If the papers are accepted by the SCI/SSCI indexed journals, the authors will be subject to the charge policies of the journals. No extra fees will be charged by the conference. In addition, editors of SCI/SSCI indexed journals will attend the conference. Therefore, participants will have the opportunity to have a face to face communication on how to publish high quality papers in reputable international journals.

You are invited to submit an abstract or a manuscript (no page limit) to the conference. We expect you to give a talk and exchange ideas with international colleagues, as well as enjoy and experience the great city of Beijing!

Relevant topics include, but not limited to:

Artificial Intelligence and Management	Computer Science
Data Mining	Decision Science
Decision Support Systems	Digital Economy and Innovation
Digital Supply Chain Management	Engineering Economics
